## YOUR KEY IN YOUR SMART PHONE

---

**Lock up** is an access control and management system for hotels. Guests will be able to access their rooms and all hotel services just using their smart phone. It is not necessary to change your hotel locks, **you just need to update them.**

A Bluetooth device is installed inside the lock. The system starts working alongside the existing system. It does not block other systems. **Both systems can work at the same time without interfering with each other.**

## WITH LOCK UP YOU WILL BE ABLE TO:

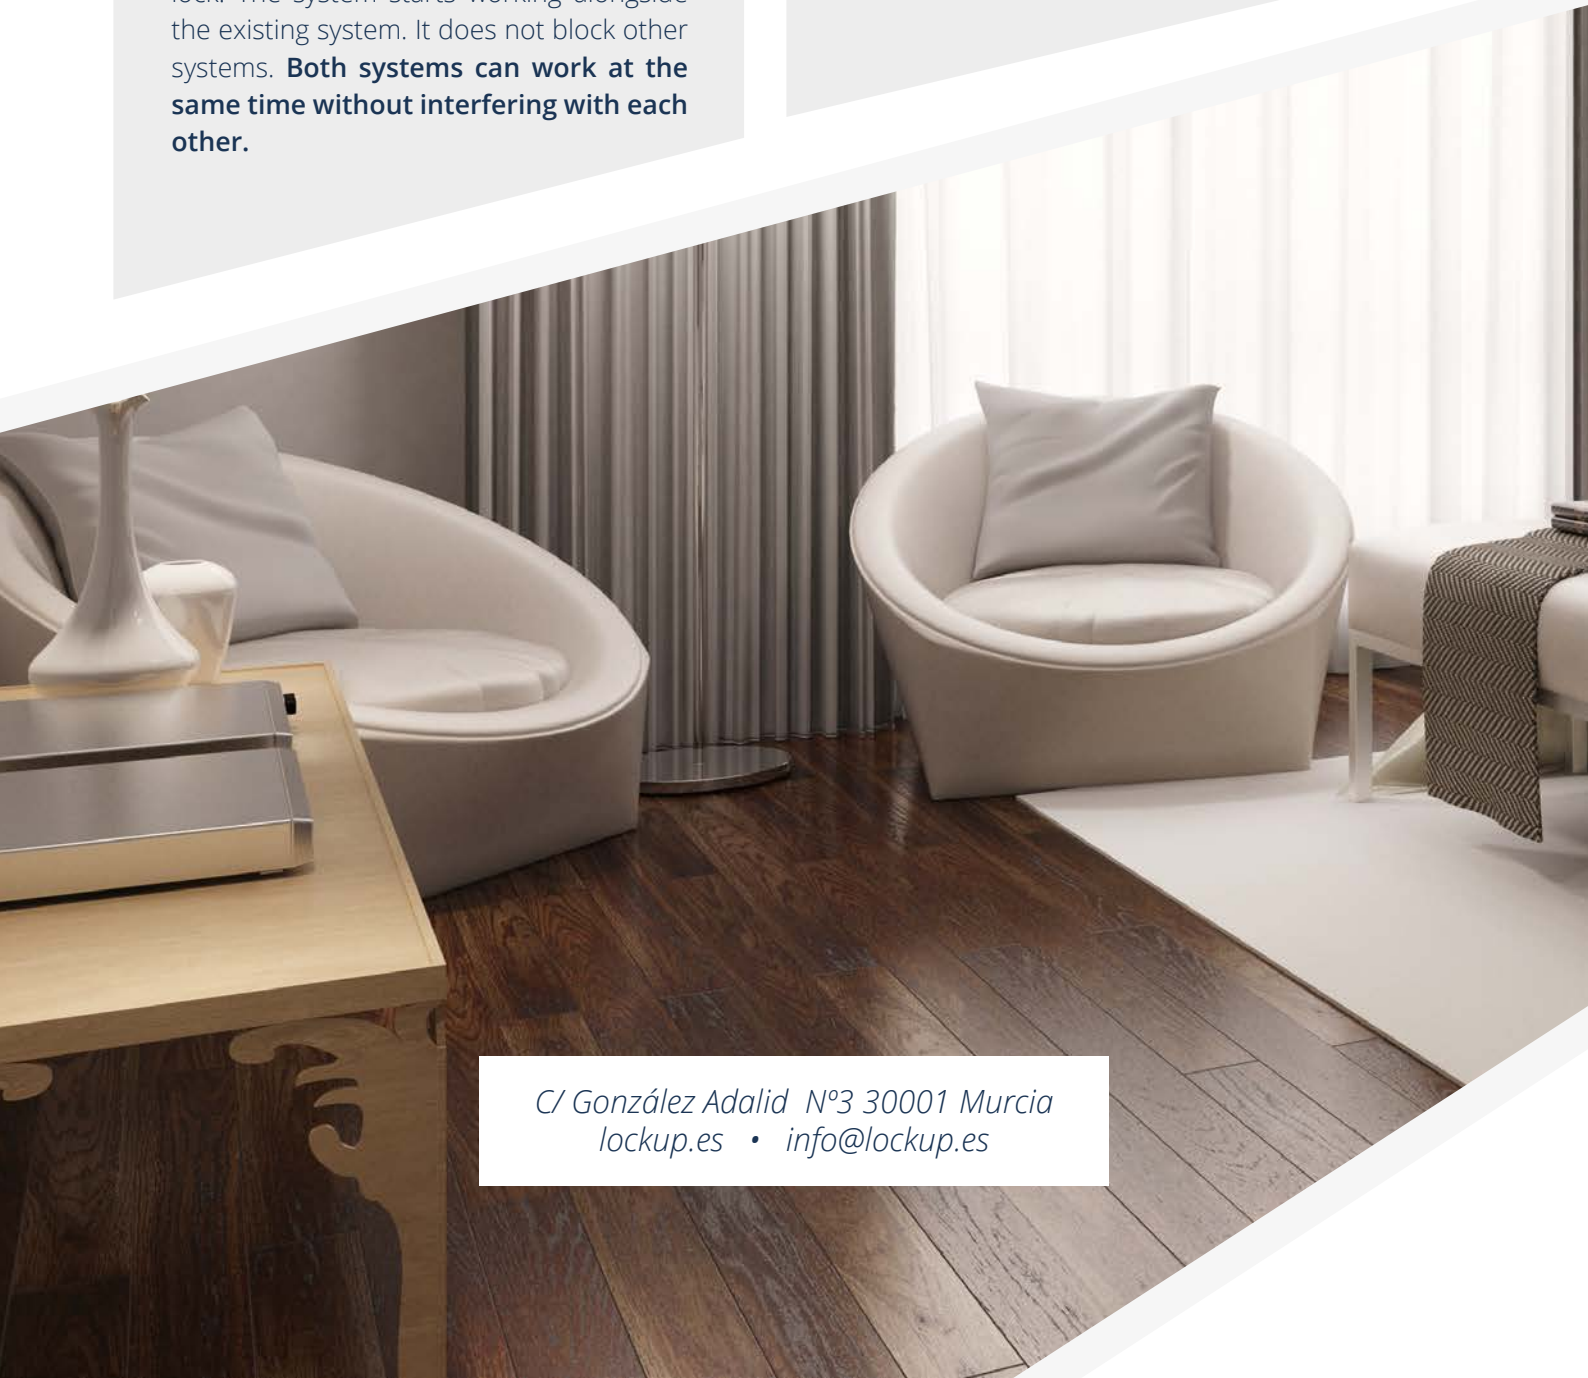

---

**Access your hotel with your phone:** obtain records of guests, manage personnel, etc.

**Forget about reception desk:** Fast Check in and Premium Check in

**Make reservations on your phone:** room service, restaurants, etc

**Book services using your mobile phone:** parking facilities, spa, gym, etc
